DETAILED ACTION

Applicants are requested to provide the application numbers and to update the status of related applications on page 1 of the specification.

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 1-21 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

The preamble reads "a method for a Facilitator". The claimed method is for a Facilitator (a businessman, a human being or a business entity). The method as claimed is implemented by a human being and not by a machine. The subject matter claimed therefore is not statutory.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Jacobs (USP 7,219,327).

Art Unit: 2155

Claims 1, 6, 13, 20, 21

See claim 1 in Jacobs. Jacobs teaches a method for creating a web site. In Jacobs, the created web site is not for assisting an entrepreneur in creating an Internet business. Steps B, C and D are essential steps for a business conducted via a web site (Internet business). If the created web site is for assisting an Entrepreneur in creating an Internet business, it would have been obvious to include steps B-D in the created web site because they are inherent steps (essential steps, without them Internet business is impossible).

Claims 2-5, 7-12, 14-19

The steps of assisting an entrepreneur in copyrighting, trademarking, selecting options and search engines are not essential steps of creating an Internet business. Rather, they are directed to a specific type of business which an entrepreneur selects to establish. It would have been obvious to a person of ordinary skill in the art to incorporate the services in the created web site which are needed to establish the specific type of Internet business the entrepreneur selected to establish so that he is able to start his business.

Conclusion
